

CrisisGo empowers people to be safer at school by putting a safety assistant on everyone's smart phone and desktop.

DRVC – Department of Education proudly recommends CrisisGo as the supplier of preference for our emergency communication platform. They are receptive to offer discounted pricing and excellent service to all Dept of Education schools for their services rendered.

A COMPREHENSIVE SUITE

- **Rapid Response**
When people are in danger, they need to notify someone immediately. Our rapid response tools allow your school staff to instantly call for help and for your safety team to notify others of an emergency through an organization-wide emergency notification with an audible alert tone.
- **Digital Plans**
CrisisGo lets you digitize your emergency plans, so everyone can have your emergency procedures on their mobile devices. Instead of worrying about finding and using your emergency three-ring binders and gradebooks during a crisis, you can keep track of your emergency instructions, student roster, building maps, and emergency contacts right from your smartphone.
- **Reporting**
When someone sees a safety risk, you want them to say something. CrisisGo makes incident reporting easier than ever before. Whether a staff member is reporting a bully, submitting an incident report, or reporting a maintenance issue, CrisisGo makes incident reporting from your mobile device quick and easy.
- **Safety Awareness**
When your school is more safety aware, they are better prepared to avoid or address a safety threat. No one knows what risks are more relevant to your school than you. CrisisGo's Safety Awareness Network allows you to inform your staff, students, and parents about what safety issues should be considered the highest level of importance. When all your stakeholders know what to look for, they can all participate in making your school safer.

Emergency Communication

The CrisisGo Safety Suite is built around emergency communication. We put your emergency response plan on smartphones, iPads, and desktops for immediate reference and use.

CrisisGo also features two-way messaging groups that allow your stakeholders to maintain communication no matter what the situation is.

- Safety teams have an unobstructed line of communication to alert staff and provide safety plans/checklists
- Time, location, and messages are recorded for reporting and analysis
- Emergency notifications can be sent to parents and guardians
- Scheduling wizard provides quick and easy scheduling of safety cards, drills, and trainings
- Library of safety content by experts, including FEMA, the CDC, and other professional organizations

It Takes a Platform

From planning and preparedness to analysis and improvement, CrisisGo includes all the modules needed to manage the safety lifecycle.
